Objective

Final-year Electronics and Communication Engineering student specializing in software development using Python, Flask, RESTful APIs, and SQL. Skilled in building scalable backend services, writing clean and maintainable code, and using Git for version control. Strong interest in backend system design, database-driven applications, and developing efficient production-ready software solutions.

Education

- **STELLA MARY'S COLLEGE OF ENGINEERING** 2022 - 2026
Bachelor of Engineering in Electronics and Communication.
CGPA: 8.20
- **CARMEL HIGHER SECONDARY SCHOOL NAGERCOIL** 2020-2022
HSC - DOMAIN (PCMB) – 71%

Skills

- **Programming Languages:** Python, SQL
- **Frameworks & Libraries:** Flask, Pytest, Pandas
- **Web Technologies:** HTML, REST API Development
- **Databases:** MySQL
- **Tools & Platforms:** Git (basic), Postman, MySQL Workbench, VS Code
- **Professional Skills:** Logical Thinking, Problem Solving, Clear Communication, Continuous Learning Mindset

Internships

- **AK INFOPARK** July 2025-August 2025
Python Developer Intern
 - Developed Python scripts to automate backend workflows.
 - Validated **REST API responses** across multiple endpoints, ensuring accurate data integration.
 - Debugged application issues and optimized logic for stable backend performance
 - Worked with Python **web frameworks** to develop and test backend functionalities.
- **ALO INFOTECH** June 2025-July 2025
Data Analyst Intern
 - Validated datasets and verified data quality during preprocessing.
 - Tested data processing logic using Python scripts.
 - Verified outputs against expected results and handled edge cases.

Projects

- **Smart Resume Analyzer (AI API Integration, Web Application, Database-Driven System)**
 - Developed AI-powered resume analysis web application using Python and Flask supporting PDF upload and automated evaluation.
 - Implemented REST API endpoints reducing manual resume review effort by **~70%** through automated feedback generation.
 - Designed database schema using MySQL enabling storage and retrieval of user feedback history with **100%** structured tracking.
 - Built PDF text extraction pipeline achieving **95%+** successful content parsing across multiple resume formats.
 - Integrated external AI API to generate structured resume insights improving analysis speed by **3x** compared to manual review.
- **AI-Powered Real-Time Traffic Violation Detection**
 - Tested detection system across **20+ edge-case scenarios**, improving output reliability and **reducing false detections by ~15%**
 - Verified AI model behaviour under multiple input conditions to ensure functional accuracy
 - Performed validation testing to maintain stable system performance during real-time processing

Achievements & Awards

- **Winner** – Paper Presentation, Elexaura Symposium, Loyola Institute of science and Technology, Apr 2025
- **Winner** – Technical Quiz, Elexaura Symposium, Loyola Institute of science and Technology, Apr 2025
- **Consistent Academic Excellence** – Maintained strong academic performance throughout B.E. in ECE

Certificates

- **PYTHON ESSENTIALS 1 - Cisco Networking Academy - Jul 2025**
- **SQL (Intermediate) Certification – HackerRank | Feb 2026**
- **Claude Code in Action (LLM Applications) — Anthropic — Feb 2026**
